

##Selector identification

Identify the selectors in each style and what HTML element(s) they target. Also, which of these examples have errors? What are they?

###1 **answer:** P is the selector, they target paragraph tags

```
p {  
  color: white;  
}
```

###2 **answer:** span is the selector, they target span tag

```
span {  
  padding: 15px;  
}
```

###3 **answer:** table and td are the selectors, they target the table and table body tags. The error is that no comma is separating the selectors

```
table td {  
  color: #222;  
}
```

###4 **answer:** .lede-section #left-side are the selectors, they target the (.)class and (#) id tag. The error is that no comma is separating the selectors

```
.lede-section #left-side {  
  position: absolute;  
}
```

###5 **answer:** #section-9 is the selector, they target the id tag.

```
#section-9 {  
  display: block;  
  text-decoration: underline;  
  font-weight: bold;  
}
```

##What's different about the following three selectors?

###6 **answer:** No comma separating the selectors just space

```
.fewd25-page-section .another-class {  
  text-align: center;  
}
```

###7 **answer:** comma separating the selectors

```
.fewd25-page-section, .another-class {  
  text-align: center;  
}
```

###8 **answer:** No comma or space separating the selectors

```
.fewd25-page-section.another-class {  
  text-align: center;  
}
```
